Arch Field Methods

3-hr credit

Requires 15 hours a week in the field

ANT 4821 (54072)

Arch Field Methods

6-hr credit

Requires 30 hours a week in the field

Field School

May 15 - June 23, 2023

Monday – Friday

9 a.m. to 3 p.m

*For more information please contact
Dr. Keith Ashley at kashley@unf.edu*

The UNF Archaeological Field School is a field practicum that offers an extraordinary opportunity to gain hands-on experience in archaeological fieldwork. Students learn basic field techniques, including survey shovel testing, unit and block excavation, mapping, record keeping, and the use of survey/mapping equipment.

This summer's fieldwork will focus on the 16th century Timucua village of Sarabay on Big Talbot Island.

*For more information visit the
[UNF Archaeology Lab website.](#)*

No prior archaeological experience is necessary to take this class, but it does help if you have taken an introductory archaeology course.
